

 **planswift**® is the ultimate software platform for streamlining the construction material takeoffs process.

PlanSwift's feature rich environment includes the ability to:

- ▶ Integrate with external applications, files and data so you don't spend time retyping quantities.
- ▶ See-through and comparative plan overlays.
- ▶ Measure linear and square footages, pitches and angles.
- ▶ Email, update, and store plans using industry standard CAD and image files.
- ▶ Download and / or upload plans to national plan rooms.

**PlanSwift offers a free one hour training session with a professional**

 Print and send plans effortlessly

 Track changes with comparative plan overlays

 Load all major CAD and image file types

 Load all major CAD and image file types

 Fully customizable hot keys and bookmarks

 Just point and click with your mouse to calculate square footage, linear footage and / or item counts

 Calculate curves (arcs) and cut-outs

 Identify takeoffs easily using labels and colors

 Maintain accuracy with the magnification tool

 Easily navigate through plans using the overview window

 With PlanSwift there is no need for old fashion rulers and highlighters

**Don't waste time doing takeoffs by hand.**
